

# ANNUAL ALUMINIUM SYMPOSIUM

December 10<sup>th</sup> 2014

GE Auditorium - Qatar Science and Technology Park (QSTP) Doha, Qatar

8:00 am - 2:00 pm

## Mission of Symposium:

Qatalum/Hydro and Qatar University have joined hands to support developing competence in Aluminium production, application and research in Qatar.

Witness an exciting day of discourse on Materials challenges for the 21st Century with focus on Aluminium. The evergreen metal is extensively used in Aviation industries and is making great strides in the Auto industries, while the Marine sector is the new frontier for this super metal.

We have lined up an array of internationally renowned experts from Industries such as Boeing, VW, Qatalum/Hydro, Marine Clean Tech and from Academia: Qatar University and NTNU and research organizations CAM, Sintef to give stimulating presentations on in this Aluminium Symposium.

## Who should attend:

- Managers and technical expertise.
- Expertise of Environment and Industries
- Investors in Aluminium downstream industries.
- University faculty, researchers and students.
- QF and QSTP researchers.
